Insights

Europe & Greece

Europe

- Euro Area Inflation (2,6%) is at its highest since July '24
- Despite rising inflation, value growth slowed to 1,9% in L52W to Dec
- In the FY '24, across the EU6, units grew at 0,8%
- FY Unit sales grew in key food categories such as Chilled & Fresh (+2,2%), Ambient (+0,8%), Frozen (+1,2%)
- National Brands continue to promote more heavily than Private Labels

Greece

- Greek inflation (2,7%) almost at the same level
- Value growth slowed down in GR as well to 2,6% in '24
- During '24 units grew at 2,8%
- Food categories noted value increase in GR
- National Brands continue to promote, total value sales performed under TPR rose to 25,8%
